

# 2010 TRAINING SCHEDULE

## ABOUT THE CLASSES

R.F. MacDonald Co. provides a full schedule of boiler and pump classes that are attended by hundreds of participants each year throughout California and Nevada. Each class offers highly qualified speakers including manufacturers, industry experts and our own highly experienced technical personnel. Most of the classes feature class curriculum along with in-depth, hands on training programs.

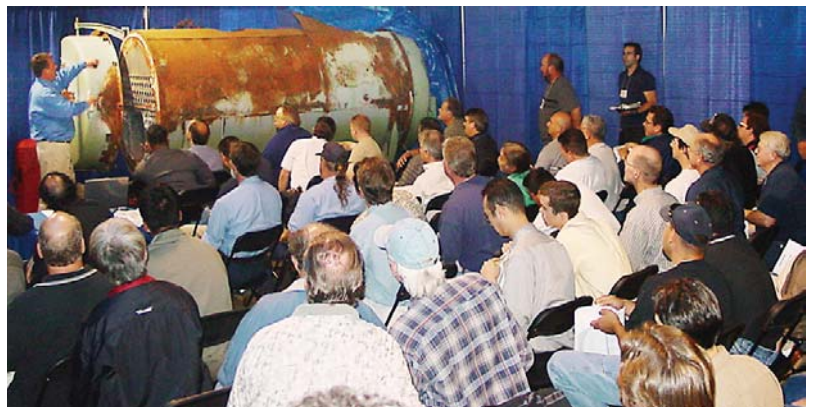

At the conclusion of each class, participants are mailed a certificate. These certificates are approved by the California Water Environment Association (CWEA) and the Association of Facilities Engineering (AFE) and class hours can be credited towards continuing education requirements for re-certification.

The classes are attended by people with similar on-the-job requirements that provide participants with an enhanced peer to peer learning environment and an interesting group dynamic. Each participant leaves with a complete binder of presentation and reference materials. Breakfast, lunch and break meals are included and there are usually drawings and giveaways during the classes.
