

# IIT Goulds Model SRL New Product

ITT Goulds is pleased to announce a new release of the Model SRL. It is the original rubber-lined pump with nearly a century of proven experience. With thousands of installations, it is the workhorse in industries such a Mining, Aggregate, Power (FGD) and others.

This new 12 page full color bulletin covers all styles of SRL pumps including:

**SRL-XT** – featuring rubber thickness up to 3 times than for conventional rubber-lined pump making it ideal for SAG mill, ball mill and other severe services.

**SRL-S** – featuring the patented design Shearpeller® specifically to handle froth and large, stringy solids without plugging. The SRL-S enables you to offer smaller pumps in froth applications for an extremely competitive selection against other suppliers.

Great features such as:

- Ceramic-Rubber Suction Wear Plates – Provide 2-4 times the life of a standard wear plate and help maintain efficiency and reduce downtime.
- Hybrid Liners – Unique fiberglass backed liner standard on the larger sizes. Allows for easy handling and resist collapse during upset conditions.
- Extra Thick Rubber Liners – Higher resilience for severe mill discharge duties.
- Large Diameter Impellers – Lower operating speeds and extended wear life.
- Heavy Duty Cartridge Style Power End – Large diameter shaft and bearings with 5 year L10 life, oil lubrication and grease packed labyrinth end caps.
- Elastomer Application Guide – Large selection with physical properties.

Take a look. This new bulletin is now available on line at [SRL Product Bulletin](#). One look and you'll realize why the SRL has been an industry leader.
