HEALTHCARE SOLUTION EXPERTS

DECADES OF EXPERIENCE

Fulton has been providing boilers to the healthcare industry for more than 50 years. We understand the unique heating and sterilization requirements of hospitals and critical-care facilities.

▼ VERSATILE EQUIPMENT

Fulton boilers are capable of producing clean steam for autoclaves and sterilizers with full backup redundancy, but are also suitable for central boiler plants and other traditional processes.

▼ ONE-STOP SHOPPING

Fulton is a single-source manufacturer of complete, pre-piped, Engineered Systems that are fully customizable to satisfy even the most complex design and operation requirements.

SAVE MONEY AND SPACE

Fulton boilers are compact-designed and built to optimize energy use year after year. The resulting utility savings are passed directly on to the facility, allowing you to invest where it is needed most – patient care.

▼ MAXIMUM EFFICIENCY

Fulton boiler systems achieve industry leading efficiencies and unmatched turndowns. You can monitor and manage demand loads with intelligent boiler sequencing to optimize plant performance.

▼ MINIMAL FOOTPRINT

Fulton's engineered systems occupy less than half the space as competing equipment through a modular array approach which fully integrates multiple boilers with all ancillary equipment.

▼ *A healthcare facility in Wisconsin utilizes a custom hybrid Fulton Engineered System featuring VMP and Vantage boilers.*

PERFORMANCE YOU CAN TRUST

UNMATCHED RELIABILITY

24/7 BACK-UP

To keep critical processes running in the event of a fuel disruption, Fulton offers dual-fuel options. We can also supply an **N+1 engineered system** to provide the redundancy required in the healthcare industry.

SUPERIOR CONSTRUCTION

With **construction materials up to 28% thicker** than other designs, Fulton boilers are more durable and resistant to corrosion. This means less time and money spent on chemical treatment, maintenance, and equipment replacements.

BUILT TO LAST

All Fulton boilers are warranted for 5 years and that **warranty doubles to 10 years** when the boilers are part of a custom engineered system; this is unmatched in the industry.

HEALTHCARE CASE STUDY

- ▶ CUSTOMER: RUSH FOUNDATION HOSPITAL
- ▶ FULTON REP: DELTA THERMAL SOLUTIONS
- ▶ MARKET: HEALTHCARE
- ▶ APPLICATION: CLEAN STEAM (MULTI-USE)
- ▶ EQUIPMENT: VMP™ DUAL-FUEL (150HP)

FULTON STEAM SOLUTIONS, INC.

With minimal footprints and flexible configurations, our range of vertical steam boilers and engineered systems offer the most complete solutions for industrial applications.

FULTON HEATING SOLUTIONS, INC.

Our full range of ultra-high efficiency condensing hydronic boilers are designed for the commercial heating market and feature dual-fuel and low emissions options.

FULTON THERMAL CORPORATION, INC.

Reaching temperatures up to 750°F (345°C), our thermal fluid heaters are ideal for process heating applications including asphalt, food, pharmaceuticals, and chemical processing.
